

Abstract

The invention relates to a method for setting audio parameters in a digital signal processor (4) in an electronic device (1) comprising at 5 least one auxiliary device connection (10) for connecting at least one auxiliary device (11). At least some of the audio parameters can be loaded into the digital signal processor (4) during operation of the electronic device (1) either from the auxiliary device (11) or from a writeable mass storage (25).
